

Wee Stand™

One music stand. Many ways to play.

INTRODUCING WEE STAND

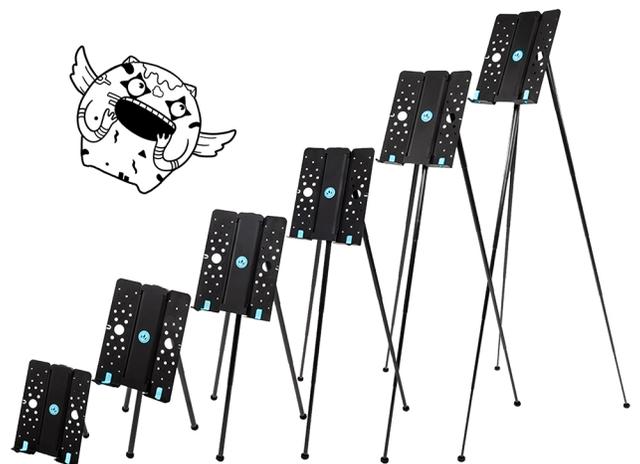

Fun fact: The patent for the portable music stand, or 'bland' stand, dates back to 1911 and they have barely changed since then. In fact, the last noticeable design changes were in the 1950s!

We knew there had to be a better way.

Whilst our product is perfect for any musician who uses a music stand, we were inspired to design a stand for students who need a lighter, simpler, and more durable way to take their music with them wherever they go.

Introducing Wee Stand: The lightest, most versatile, ultra-portable music stand on the planet!

Designed with our kids in mind, our portable music stand quickly became a staple in our grownup gig bags, as well. Wee Stand works for any musician on the move!

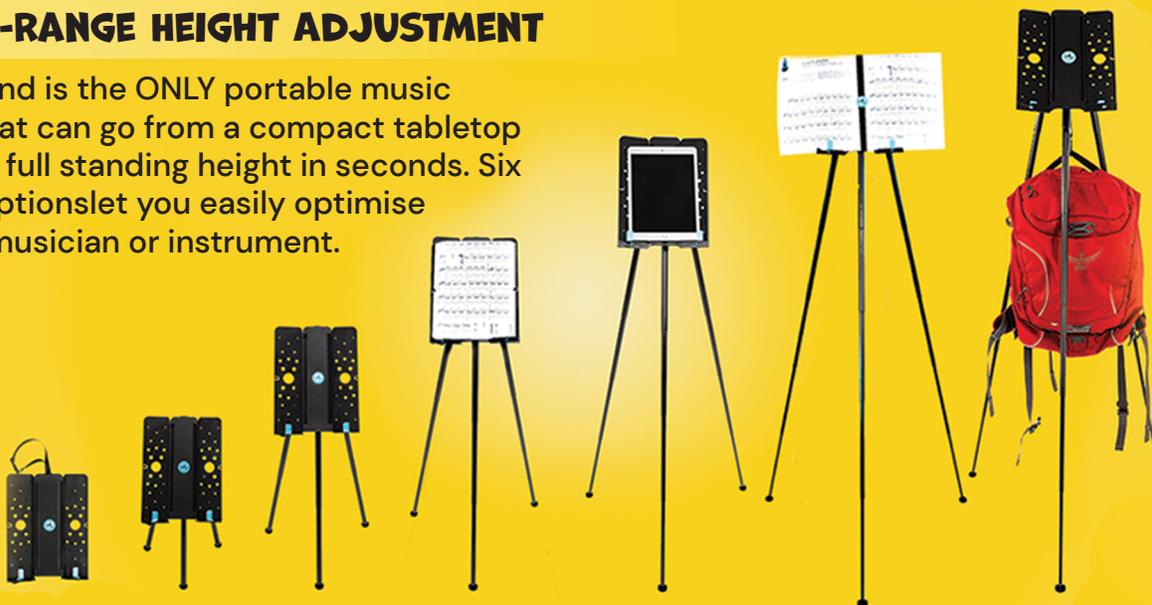

MEET YOUR NEW MUSIC MATE

Don't be fooled by its size – Wee Stand performs! Here are some of the exceptional features that make our patented design (dare we say it?) stand out:

★ FULL-RANGE HEIGHT ADJUSTMENT

Wee Stand is the ONLY portable music stand that can go from a compact tabletop stand to full standing height in seconds. Six height options let you easily optimise for any musician or instrument.

★ TENSION-LOCK LEGS

Adjust the height in seconds and keep the legs in place with our unique Tension-Lock legs.

IMPORTANT: Wee Stand legs are designed to be pulled, NOT twisted. We are not your traditional tripod!

 Like any innovative product, Wee Stand will seem a wee bit unfamiliar at first. Noisy Clan design engineer Jaren explains how the legs work [in this short video](#).

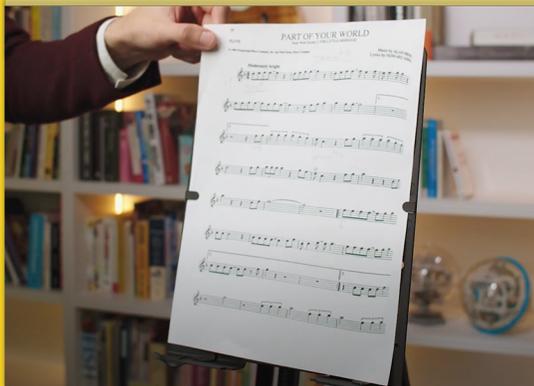

★ TILT-TOUCH ANGLE POSITIONING

Effortlessly adjust the media plate to the angle that suits you.

SHEET SEVER TABS

Hold a single page securely – no more chasing after flying sheet music!

EMBLEM CLIP

Side-by-side sheets slip underneath for added stability.

SWIVEL CLIPS

Swing out these page holders to manage books or multiple sheets.

WEE STAND. MIGHTY BENEFITS.

Sturdy

Wee Stand is small, yet mighty. Thanks to durable glass-filled, post-consumer plastic and incredibly strong carbon fibre legs, this stand is sturdy enough to stand up to the job.

Portable

Wee Stand is strong yet still lightweight and compact enough to be taken with you wherever you go. Weighing in at 550g, or about 1 lb, the materials we've chosen have the highest possible strength-to-weight ratio, for a perfect harmony of strength, stability, and convenience.

Versatile

Wee Stand's versatility means you can play any instrument on virtually any flat surface and the comfortable wrist loop can double as a counterweight strap for windy conditions.

Kind to Instruments

Rounded, soft edges ensure that you won't damage or scratch your treasured instruments.

We want you to LOVE Noisy Clan products! For added assurance, every Wee Stand comes with a 3-year warranty, as well as a 30-day money back guarantee.

THE NOISY CLAN STORY

Noisy Clan is more than a brand – we're a family of musicians and parents who want to share our love of music with the world.

Our story starts in music class. We knew that going to school meant juggling rucksacks, books, PE kits, and musical instruments at once. When we added a music stand – an undeniably important part of any young musician's kit – into the chaos, things started to fall apart. Literally.

Instruments got scratched, clothes were torn, and attitudes were soured due to lugging the clunky, painfully sharp, traditional music stands. They made playing music feel like a chore instead of an adventure.

We decided to do something about it. To help our kids manage their stuff – and make playing music more, well, *playful*. We designed the world's lightest, most versatile, ultra-portable music stand that can be tucked right into a rucksack, music bag or even a pocket without causing any damage or tears of frustration. Using Wee Stand means less fuss – and that means more time for the fun part – playing music!

Wee Stand by Noisy Clan. Get out and Play!

Wee Stand's patented design is a symphony of exceptional design, effortless convenience, and durable materials coming together to create a music stand that outperforms the traditional 'bland stand'. Tired of cheap, 'throwaway' music accessories, we combined post-consumer plastics with strong carbon fibre and stainless steel for a strong, yet ultra-lightweight solution.

Creating and developing Wee Stand was by no means a wee achievement. Our kids are playing more and having more fun doing it. And we've gotten in on the action, too, using Wee Stand for our own gigs and rehearsals, as well as finding a few 'off label' uses, like using the stand to hold our tablet during calls with Grandma. We're so happy with the results that we had to share it with the world!

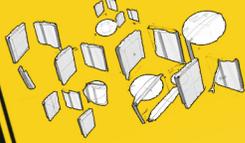

2017
David had
an idea!

**Wee Stand launches on
Kickstarter June 22**

We have built prototypes, tested extensively, built more prototypes, and tested yet again, until we got every detail just right. We have started our small-scale production with a limited manufacturing run. This means we are tooled and ready for mass production! Once our crowd-funding campaign has ended, we will start shipping to backers within 5 weeks!

2018
Prototypes...
many prototypes.

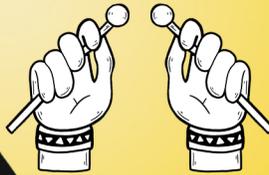

2019
